PRÆFATIO.

stines, advenis, dactyli sunt. Ergò recurrendum est ad 3. in qua invenies quæsitum dactylum e.g. abluus. Similia argue de aliis numeris, personis, temporibus, modis. Nam prima persona pluralis numeri aliam pedem accipit in 1. conjugatione, alium in 3a, ut docent supposita verba: abdicamus, abluimus.

Idem argue in nominum declinationibus & incrementis. Nam alius est genitivus 1. & 2. declinationis, alius 3. ex eodem pede e.g. choreo. Nam 1. & 2. declinatio format spondæum. 3. verò vel choreum, vel dactylum. Qui itaque egeris dactylo in genitivo, non recures ad 1. aut 2. declinationem, sed ad 3. ejusque vel choreum habentem incrementum breve, ut notatur fol. 7. 17. 112. 117. vel dactylum carentem incremento, ut notatur fol. 23. 25. & 135.

PRÆFATIO

Ex hac nota quisque prudenter arguet tam de casibus in nominibus, quam de temporibus, modis, numeris & personis in verbis, ubi quodlibet eorum, quibus eget, inveniendum sit. Supererant præterita, & tempora ab ijs dependentia, quæ ex participijs erui non poterant. Huic inopiæ & malo ut occurreremus, addidimus auctarium præteritorum fol. 104.

Ex comparativis & superlativis quoque nonnulla exempla sparsim damus, ut te amice lector tædio ea ex positivis rimandi sublevaremus.

IV. Nota. Descripturus opus eximium, adde opificem inventum ex annotatis inter nomina propria, ut dicturus. *Clypeus fulget. dic Clypeus Didymaonis artes fulget.* Nomen Didymaonis subministrante folio 242.

nomina propria hoc libello citata. Resp. non unam ex illis capi utilitatem. Nam I. hinc metra adimpleri possunt eruditionibus. Vt si laudandam suscipias laurum, eam attribues monti reperto sub eo pede, quem tuum metrum postulat. ut *Lauro Caesar coronat tempora. dic: Lauro Martini gloriâ Cesar coronat tempora.* Verum nihilominus etiam est, requiri aliquam eruditionem, ut ne quis contra veritatem peccet, & laurum Rhiphæo attribuat. Quare hæc eruditio secundior est eruditis. II. Propria facem præferunt intelligendis adjectivis, & patronymicis, quæ in tertia libelli parte à fol. 117. afferuntur. Quis enim vocem. *Pharsalicus* ex fol. 193. intelliget, & tuto absque detrimento decori & veritatis suo pœmati inseret, nisi ad manum habeat tabellam referentem significationem primigenij.

PRÆFATIO.

Præterea, quod ex hac nominum distributione agnosces quantitatem singulorum, neque egebis adminiculo Smetij, & similium.
